FAMICHAIN ECO $FME
WHITEPAPER

AN CROSS-CHAIN PROJECT

FME token used in the FamiChain Network can be used as FamiChain Exchanges (CEX) native token. We have created a new L2 token that reduces network congestion (causes gas fees to skyrocket) and is close to the speed of Bitcoin Lightning Network. This is a project that makes it easier and more economical to transmit and interact with transactions and smart contracts on multi-chains.

FamiChain is backed by FamiChain LLC (USA) and FamiChain Limited (UK) as well as a number of other investment organizations globally.

ISSUES CHECKING

| No	Issue description	Result
01	Compiler errors.	PASSED
02	Race conditions and Reentrancy. Cross-function race conditions.	PASSED
03	Possible delays in data delivery.	PASSED
04	Oracle calls.	PASSED
05	Front running.	PASSED
06	Timestamp dependence.	PASSED
07	Integer Overflow and Underflow.	PASSED
08	DoS with Revert.	PASSED
09	DoS with block gas limit.	PASSED
10	Methods execution permissions.	PASSED
11	Economy model of the contract.	PASSED
12	The impact of the exchange rate on the logic.	PASSED
13	Private user data leaks.	PASSED
14	Malicious Event log.	PASSED
15	Scoping and Declarations.	PASSED
16	Uninitialized storage pointers.	PASSED
17	Arithmetic accuracy.	PASSED
18	Design Logic.	PASSED
19	Cross-function race conditions.	PASSED
20	Safe Open Zeppelin contracts implementation and usage.	PASSED
21	Fallback function security.	PASSED

Blacklisted address can transfer approved tokens using transferFrom() function.
Only Owner can add/remove blacklisted addresses.

Dev: Maintain the stability and development of the entire ecosystem. Managed by Founder.
Marketing: Maintain the marketing viral events of the entire ecosystem. Managed by CMO.
LP: Keeping liquidity is always active throughout the ecosystem. Managed by Pancakeswap Router.
Community: The official circulation amount of the entire ecosystem. Managed by $FME Holders.
Staking: Hedge Fund for Token Staking. Managed by FamiChain Exchanges.
Talent: The Foundation supports dApps developer in the ecosystem. Managed by Marketing Team.

Dev Fund & Community Fund & Marketing Fund - automatically burn 1.3% of the supply
at the time of burning every 18th of every month.

=== ECOSYSTEM ===

1. FamiChain Tracking
track.famichain.com

FamiChain Tracking is a databaseless statistical platform under Blockchain technology. We only scan data from more than 200 partners' servers globally to display information instead of pulling data directly from our servers, which will help you to limit information disclosure.

2. FamiChain Wallet
wallet.famichain.com

FamiChain Pay is an open source multi-network wallet project. FamiChain Pay uses Gas Stations mechanism to reduce remittance fees as well as improve processing capacity on-chains

3. FamiChain Pay
pay.famichain.com

FamiChain Pay is a solution for payments using FamiChain Network's proprietary Proof-Lightspeed mechanism. Verify transactions on blockchain system with only 3 seconds and 1 cent USD gas fee.

4. FamiChain Exchanges
famichain.app

FamiChain Exchanges owns a proprietary Anonymous CEX mechanism. You can make trades with your personal wallet without any restrictions or limit because you are participating in the FamiChain Pool, all of this powered by Binance Labs.
